# Note to the Teacher:

- Before playing, remind students what related facts are. Related facts have the same parts and wholes. Fact families are another name for related facts. In a fact family, all three numbers in the addition or subtraction sentence are the same but in a different order.
- Tell them that if you call an addition sentence, they should be looking for a related subtraction fact. If you call a subtraction sentence, they should be looking for a related addition sentence.

Directions for the Teacher:

Cut out the related facts below. Put them in a bag or container and call them out randomly.
